Product Description

Product Description:

The Hybrid EV Cars are equipped with a long warranty, ensuring that customers can enjoy their car without worrying about unexpected repair costs. With a front-wheel or all-wheel drive, the Hybrid EV Cars offer a smooth and comfortable ride, providing an unparalleled driving experience.

The Hybrid EV Cars are a type of vehicle that runs on both gasoline and electric power. This unique technology allows the car to be environmentally friendly while still providing the power needed to travel at high speeds. The Hybrid EV Cars have a top speed of 100 km/h, making it a great option for those who seek a fast and efficient car.

Our Hybrid EV Cars are set to hit the market in March 2022, making it the perfect time for those who are looking for a quality car that delivers both performance and efficiency. With its sleek design and advanced features, the Hybrid EV Cars are sure to turn heads on the road.

Overall, the Hybrid EV Cars are an excellent choice for those who want to experience the benefits of a hybrid car without compromising on power or style. With a low maintenance cost, a long warranty, and top-notch features, the Hybrid EV Cars are the perfect investment for any car enthusiast.

Applications:

One of the main application occasions for the Qin plus is for personal use as a daily driver. Whether commuting to work or running errands around town, the Qin plus offers a comfortable and efficient driving experience that can help save on fuel costs. Additionally, the low maintenance costs make it an affordable option for those looking to save money in the long run.

Another scenario where the Qin plus excels is for use as a minicar or taxi. Its compact size and front-wheel or all-wheel drive make it easy to navigate through crowded city streets, while its high interior comfort provides a pleasant ride for passengers. The hybrid engine also makes it an attractive option for environmentally-conscious taxi companies and ride-sharing services.

Whether for personal or commercial use, the Qin plus is a reliable and efficient vehicle that is sure to impress. With a minimum order quantity of just 1 and payment terms of T/T, it is easy to get your hands on this high-quality hybrid EV car. And with its impressive top speed, green credentials, and low maintenance costs, the Byd Qin plus is an excellent choice for anyone looking for a versatile and efficient vehicle.

Customization:

Customize your BYD Qin plus Hybrid EV car to meet your specific needs. With various models available, you can choose the perfect combination of power and fuel efficiency. The Qin plus is a MINIEV that runs on both electric and gasoline, making it an eco-friendly choice for the environmentally conscious driver.

Our Hybrid EV cars are made in China and come with a long warranty for your peace of mind. The minimum order quantity is 1, and we accept payment terms of T/T. The market time for this model is 2022.03, so you can be sure you're driving a modern car.

Whether you're looking for a 100% electric car or a hybrid option, we've got you covered. Contact us to discuss your customization options today!
